A Taste of TED: "Ideas Worth Spreading" From a JPLers Perspective

Presented by Dan Goods, Visual Strategist, Section 312 (Mission Systems Concepts)

Bringing back extinct animals, 15 year olds inventing cancer detectors, human beatboxers... These are just some of the "Ideas Worth Spreading" that you might hear at a TED conference. Dan Goods has been fortunate enough to attend a few of these events over the years as a volunteer, attendee, and even showing artwork related to JPL missions. Come for a special showing of a few of this years unreleased talks. Learn the difference between TED and TED Active/Global/Africa/X events. And get some history and back story to this global phenomenon.
